

ScriptShelves Efficiency

Increased Patient & Staff Satisfaction

ScriptShelves organizes and manages prescriptions, tracks status via software, and integrates with a patient notification program to alert patients by text or email. Plus, ScriptShelves requires no remodeling, expansion, or construction.

How ScriptShelves Improves Pharmacy Efficiency

Increased patient satisfaction	Increased process efficiency staff satisfaction	Time and money savings	Challenges With Traditional Rx Storage & Retrieval
Less searching for Rx = less waiting time	Track-and-trace software runs the entire process	Positive impact on pharmacy space, organization, and cash flow	Multiple processes run simultaneously to get an Rx to a patient
Patients stay informed -- notification by text messages	Shorter queues	No remodeling: Use existing shelves, refrigerator, drawers, etc.	Orders can be lost, difficult to find, difficult to disassociate from bulk storage
If Rx not ready, patients will not arrive early	No long-term Rx storage or loss of medicines (FMD)	12-16 hours/week/branch time savings	
Automatic reminder notification for unclaimed Rx	All paperwork clipped to script-bag; no extra searching, everything together	Less time between "Rx ready" and "Collection"; space savings; better cash flow	
Shorter queues	Increased safety -- no prescriptions (declarations) forgotten		
Integrates with RoboWall for 24/7 service	Added efficiencies for HomeDeliveries drivers
